

Cockroach Treatment Preparation

1. **Completely empty kitchen cupboards.**
2. **Remove all food** and items from cupboards. Food needs to be **covered** with a plastic sheet and placed on a table
3. **Empty** all items from under the kitchen and bathroom sinks.
4. **Take out** all trash.
5. **Pull** stove and refrigerator away from walls.
6. Anything that is on the floor needs to be **pick-up** as much as possible and **moved** away from the walls, **to ensure proper coverage of product application.**
7. Unit needs to be **vacant** for **4 hours** (minimum) **After** treatment is complete. **Treatment application time is up to one hour per unit.**

Pet Safety: Remove food and water from dishes and wash with warm soapy and water after treatment. All pets need to be removed from property including fish, fish tanks, birds, bird cages, and reptiles.

Food Safety: Any surfaces that are eaten on or used for food preparations, (countertops, stoves, cutting boards) if left out, needs to be washed with warm soapy water.

If possible place new shelf paper in the cupboards or wipe down with warm soapy water when treatment is complete.
